

ASSEMBLY INSTRUCTIONS FOR TETRA STAYCLEAN BIO-BAG CARTRIDGE

- 1) Remove old cartridge (keep the frame and clip for reuse with unassembled cartridges if desired)
- 2) Take the Stay Clean Aerobic Filter Frame (with tablet holder) and for the first use, twist the clip off the frame.
- 3) Remove tablet from foil pouch, insert the tablet into the tablet holder, and secure the cap.
- 4) Slide the filter bag over the frame. Add one packet of Ultra-Activated carbon.
- 5) Press the frame flaps down over the top of the filter bag and press the clip down over the flaps.
- 6) Rinse filter cartridge under room temperature tap water until water runs clear.
- 7) Insert rinsed cartridge into filter, ensuring it fits into designated channels.
- 8) Replace filter cartridge and tablet monthly (use the Tetra My Aquarium App to schedule a reminder).

For aquariums established less than one month use regular Bio-Bag or the Stay Clean starter cartridge that came with your filter.

NOTE: When medicating your aquarium, remove carbon from cartridge.

INSTRUCTIONS (assembled cartridges):

- 1) Remove old cartridge (keep the frame and clip for reuse with unassembled cartridges if desired).
- 2) Rinse new filter cartridge under room temperature tap water until water runs clear.
- 3) Insert rinsed cartridge into filter.
- 4) Replace Stay Clean filter cartridge monthly (use the Tetra My Aquarium App to schedule a reminder).
- 5) For aquariums established less than one month use regular Bio-Bag or the Stay Clean starter cartridge that came with your filter
