SURE FLAP®

give your pet
**their own
door key**

SureFlap microchip pet doors enable your pet to access the outdoors safely, while keeping unwanted intruder animals out of your home.

Suitable for cats and small dogs, the doors unlock only for your pet, as they recognize your pet's identification microchip, which acts as a personalized door key.

also available in brown

What our customers say...

“Having a SureFlap door has given me piece of mind. I don't have to worry about my cats not having a safe place to go. The raccoons are out and the cats can come in.”

Nathalie, Arkansas

“It has given my cat independence and freedom from fear! She was being stalked by a neighborhood cat after we moved house, who was chasing her into our house in the early mornings. This was terrifying for her and not fun for us at 5am. Now, she can come and go as she pleases. We saw first hand when the cat chased her into the house, she got in through the cat door and the other cat just slammed into the closed flap - no injury, just a good lesson. Thank you!”

Jane, Seattle

All SureFlap pet doors can be installed in doors, glass or walls.

Door Installations

The simple two-part construction makes SureFlap products quick and easy to install. A mounting adaptor may be required depending on the type of door.

Wall Installations

Tunnel extenders enable fitting into a wall of any depth. A mounting adaptor may be required for the Microchip Cat Door and DualScan Microchip Cat Door.

Glass Installations

A qualified glazier is recommended to help with installation, as a circular hole is required. Mounting adaptors are essential.
